

MD TAZAMMUL HOSSAIN TAZ

Project Manager | Humanitarian and Development Programmes

Dhaka, Bangladesh | +88 01675291441 | tazammul.h.t@gmail.com | linkedin.com/in/Tazammul

Professional Profile

Civil engineer and development professional with more than seven years of progressively responsible experience managing humanitarian and development programmes in Bangladesh. Experience covers shelter, WASH, disaster risk reduction, climate resilience, settlement planning and community infrastructure. Led complex donor-funded programmes from design and resource mobilization through implementation, monitoring and reporting. Worked closely with UNHCR, IOM, the European Union, government authorities, NGOs and communities. Brings practical field judgement and the ability to connect programme, financial and stakeholder priorities.

Career Highlights

- Managed a UNHCR-funded shelter project serving approximately 210,000 Rohingya refugees across seven camps and delivering around 12,000 shelter repair interventions annually.
- Managed an annual project budget above USD 2 million with approximately 99% utilization while maintaining donor compliance and quality delivery.
- Led the establishment of a EUR 4.2 million EU-funded humanitarian-development multi-sectoral programme after serving as programme focal point during approximately 18 months of piloting, design and proposal development.
- Designed and operationalized integrated programme systems for a EUR 4.2 million EU-funded initiative, linking programme, MEAL, finance, procurement, HR and technical functions around a common results framework.
- Led multidisciplinary teams of up to 43 staff and trained 28 technical staff, with direct experience in performance management, coaching and staff development.
- Contributed to three successful UNHCR funding proposals and introduced improvements using Kobo, Power BI & SharePoint.

Core Expertise

Programme & Project Management | Results-Based Management | Annual Work Planning | Budget & Risk Management | Monitoring & Donor Reporting | People Leadership | Multi-stakeholder Coordination | Resource Mobilization | Shelter & WASH | DRR & Climate Resilience | Settlement Planning | Procurement & Contractor Management

Professional Experience

Technical Manager, Housing Solutions

Habitat for Humanity International, Dhaka, Bangladesh | January 2026 - Present

Provide national technical leadership for four community infrastructure projects in Dhaka, Satkhira and Cox's Bazar.

Technical Leadership and Programme Quality

- Lead final technical review and approval of engineering designs, BOQs, cost estimates, procurement specifications and construction methods, helping teams balance quality, cost and field practicality.
- Support proposals, concept notes, logframes, budgets and technical narratives and contributed to Habitat Bangladesh's three-year business plan.
- Integrated climate resilience, DRR and accessibility into technical review. Required ramps and handrails in housing and WASH facilities and introduced grooved and colour-contrasting paving and grab rails to improve access for people with visual impairment, pregnant women, children and older people.
- Developed standard drawings, construction safety procedures, procurement specifications and quality assurance tools and drafted a Housing Design Manual now under technical review.

Operational Improvement and Capability

- Introduced a SharePoint-based engineering review and approval workflow that simplified technical review and created a searchable design repository for future programme use.
- Mentor four engineers through design review, coaching and practical problem solving and trained technical staff on construction safety and 3D visualization.
- Facilitated a green housing workshop for masons, carpenters, house builders and community members in Satkhira and coordinate with government counterparts, partner NGO Uttaran, consultants and contractors.

Project Manager, Humanitarian-Development Co-existence Nexus (HDC)

BRAC, Cox's Bazar, Bangladesh | April 2025 - August 2025

Led the establishment of a EUR 4.2 million EU-funded programme integrating WASH, climate resilience, settlement planning, community infrastructure and local development in Rohingya camps and host communities.

Programme Establishment and Resource Mobilization

- Led the Annual Work Plan, implementation schedule, procurement plan, operational budget, monitoring framework, indicator matrix and risk register for programme start-up.

- Used evidence from a pilot that integrated health, WASH and education volunteers around common household outreach. MIS trends showed improved school attendance and fewer reported disease cases, strengthening the case for the model in the funded programme.
- Served as programme focal point during approximately 18 months of development, contributing field evidence to the concept note, proposal, technical narrative, budget, logframe, results framework, MEAL framework and sustainability planning.
- Joined consultations with UNHCR sectors and other partners, translated feedback into programme design and incorporated settlement planning following UNHCR recommendations.
- Designed a Kobo-based household outreach approach so volunteers could visit households rotationally and record needs from residents who could not easily reach camp offices.

People Leadership and Partnerships

- Recruited, interviewed, inducted and led a 43-member multidisciplinary team and aligned programme, MEAL, finance, procurement, logistics, HR and technical functions around common delivery arrangements.
- Worked with protection and specialist teams during programme design and recruited two legal officers and two psychosocial counsellors for planned support to women survivors of trafficking.
- Coordinated with the EU, UNHCR, RRRC, Camp-in-Charge offices, government agencies, UN organizations and NGOs, including a high-level inception meeting with senior government, donor and humanitarian leaders.
- Resolved start-up barriers through direct engagement with the Camp-in-Charge in Camp 27 and worked with Community-Based Protection colleagues to address community concerns about volunteer opportunities.

Project Manager, Shelter

BRAC, Cox's Bazar, Bangladesh | May 2022 - April 2025

Managed a UNHCR-funded shelter programme serving approximately 210,000 Rohingya refugees across seven camps over three consecutive project years.

Results-Based Project Management

- Led annual planning, implementation, monitoring, procurement coordination, donor reporting and risk management for around 12,000 shelter repair interventions each year.
- Prepared two Annual Work Plans with indicators and targets and led half-yearly reviews, using results frameworks, KPIs, MEAL dashboards and field monitoring to identify gaps and adjust delivery.
- Managed an annual budget above USD 2 million as budget holder, including expenditure approval, forecasting, burn-rate monitoring, reallocation and two budget revisions. Achieved approximately 99% utilization.
- Coordinated approximately 36 monthly donor reports, three annual reports, audit documentation and management briefs and presented programme and financial progress in monthly grant management reviews.
- Initiated age and sex-disaggregated data collection in Kobo assessment tools so beneficiary information could be retained and used for reporting and more targeted analysis.

Adaptive Delivery and Risk Management

- Led a cyclone preparedness campaign that reached approximately 71% of targeted households with shelter tie-down support through coordinated community action.
- Coordinated assessment, donor approval, procurement, government clearance and reconstruction after a fire affected around 50 shelters.
- Reorganized staffing and work plans after major funding reductions and maintained priority delivery under reduced envelope.
- Acted on material quality concerns by bringing procurement and the supplier together and recommending cancellation of a work order when quality could not be assured.
- Maintained and updated the project risk register and used monitoring and field evidence to adjust implementation priorities.

People Leadership and Partnerships

- Supervised 35 staff, including six direct reports, through target setting, regular performance discussions, mid-year and annual appraisals, coaching and accountability.
- Used performance improvement and targeted learning plans to address underperformance and recommended high performers for career progression.
- Trained 28 engineers on construction quality, BOQ preparation, contractor supervision, monitoring and compliance, improving field quality and reporting.
- Represented BRAC with UNHCR, RRRC, Camp-in-Charge offices, Shelter Sector, ISCG and Technical Working Groups and facilitated dialogue to resolve a prolonged material-delivery disagreement between donor implementation and logistics teams.
- Coordinated Kobo and Power BI monitoring improvements, removed two field reports with no final user and strengthened stock documentation and quality control processes.
- Contributed programme, technical and budget inputs to three successful UNHCR funding proposals.

Senior Sector Specialist, WASH

BRAC, Dhaka, Bangladesh | October 2019 - January 2022

Provided technical leadership and programme support to BRAC WASH activities across Jamalpur, Sylhet, Bagerhat and Satkhira.

Technical Leadership and Learning

- Guided eight field engineers and supported four District Managers on technical decisions, work planning, implementation challenges and quality assurance.
- Reviewed designs, BOQs, technical specifications, cost estimates, proposals and budgets and developed standard engineering drawings for multiple WASH projects.
- Introduced 3D visualization to make designs easier for field engineers and local workers to understand and assessed operating water networks to recommend performance improvements.
- Revised a pond-water intake design after a field engineer recommended additional drum and net screening for silt. I accepted the field recommendation, updated the design and achieved better source-water quality.
- Led remote commissioning of a UK-manufactured water treatment plant during COVID-19 travel restrictions by coordinating local technicians and overseas engineers through written guidance and video calls.

Government Engagement and Capacity Development

- Worked with DPHE, UNO offices, municipalities and local government institutions on WASH infrastructure and sustainable water services, including community water treatment and local water supply business approaches.
- Served as a master trainer and delivered technical learning sessions for engineers, municipal staff and waste workers, including training under an ITN-BUET initiative.

Project Engineer, WASH

BRAC, Cox's Bazar, Bangladesh | November 2017 - October 2019

Supported an IOM and DFAT funded emergency WASH programme serving approximately 47,000 Rohingya refugees across four camps during the early Rohingya emergency response.

Emergency Delivery and Operational Improvement

- Managed day-to-day field implementation of water supply, sanitation, drainage and community WASH infrastructure under rapidly changing emergency conditions.
- Supervised approximately 100 emergency latrines, 40 deep tube wells and two water distribution networks and coordinated six contractors on progress, quality and technical problem solving.
- Adapted implementation during landslides, waterlogging and public health concerns and supported emergency chlorination of drinking water sources.
- Developed a practical budget and project tracking system that improved progress and expenditure tracking and supported timely management decisions.
- Prepared daily field reports, weekly updates and monthly donor reports and coordinated with IOM, Camp-in-Charge offices, WASH Sector partners and community leaders.

Education

- MSc in Environmental Sciences | Jahangirnagar University, Bangladesh | 2024 - 2026 | CGPA - 3.6/4.00 (Academic requirements completed, official result published and certificate pending)
- Master of Governance and Development Studies | Jahangirnagar University, Bangladesh | 2026 - Expected 2027 | Ongoing
- BSc in Civil Engineering | Chittagong University of Engineering and Technology (CUET), Bangladesh | 2012 - 2018
- Certificate Course in Humanitarian Crisis Management | BRAC University, Bangladesh | 2023

Selected Professional Trainings

- Introduction to Results-Based Management | UN Women | 2024
- Strategic Project Risk Management | LinkedIn Learning with Project Management Institute (PMI) | 2025
- Change Management for Projects | LinkedIn Learning with Project Management Institute (PMI) | 2025
- The Ultimate Guide to Sustainable Project Management | LinkedIn Learning with Project Management Institute (PMI) | 2025
- 2030 Agenda for Sustainable Development and Gender Equality | UN Women | 2025
- Disability-Inclusive Disaster Risk Reduction | CBM Global Disability Inclusion | 2026
- Negotiation, Strategic Influencing and Effective Communication Skills | BRAC | 2024
- Corruption Prevention for Managers | IFRC | 2026

Languages and Digital Tools

Languages: English, fluent, with professional reading, writing and presentation, IELTS 7.0 in 2020 | Bangla, native

Digital tools: Microsoft 365, Excel, PowerPoint, SharePoint, OneDrive, Kobo Toolbox, Power BI, AutoCAD, QGIS, SketchUp and Google Workspace
